

## CITY ISLAND SAIL & POWER SQUADRON

### WEATHER COURSE

The safety and comfort of those who venture out-on-the water have always been weather dependent. In this course students will become keener observers of the weather, but weather observations only have meaning in the context of the basic principles of meteorology - the science of the atmosphere. This course focuses on how weather systems form, behave, move, and interact with one another and reflects the availability of all sorts of weather reports and forecasts on the Internet. This is a general weather course benefiting those sitting in their living rooms, as much as those standing behind the helm.

<b>Date</b>	Tuesdays starting, July 9, 2024
<b>Time</b>	8:00pm - 9:00pm
